1... | I am writing to voice my concern regarding the Yucca Mountain, Nevada proposal to store high-levels of nuclear waste at this site.

Based on information read, from the Sierra Club web site, the region is earthquake-prone. This alone could cause problems for those living near the area, but with nuclear waste also being stored in this area, could cause catastrophic problems.

I am concerned for the health & welfare of people that are living in & around Yucca Mountain. As well as, my concern of the routes that are proposed to transport the high-level nuclear waste from one point to Yucca Mountain, Nevada. I currently live in a state, as well as a city, that is going to be on this transport route. What if there is an accident...waste could easily end up in waters of ANY area along the transport routes proposed.

/

...1

So, let's take some control NOW by STOPPING the proposal of making Yucca Mountain, Nevada a storage site for these high-level nuclear wastes.\_\_\_\_\_
